Registration Phase

Email to mailing lists (e.g. WZB-mailing list)

Recipients: Researchers on mailing lists
Subject: Distributing information of potential interest to researchers

Message:

Dear [RECIPIENT],

We would like to invite you to share our call for participation in the crowdscience project #ManyDaughters using socioeconomic panel data, which might be of interest to researchers working with [RECIPIENTS-PANEL].

We are looking for researchers to submit pre-analysis plans and analysis codes in teams of two or independently to test a shared set of four hypotheses on how having daughters influences behavior and preferences using data from the German Socio-Economic Panel (SOEP). As project coordinators, we will implement the submitted analysis codes and analyze the results to gain insights into both the scientific process and the impact of having daughters. All researchers whose analysis codes are implemented will also be included as co-authors.

Please find the call for participation attached to this email. More detailed information can also be found on the project website https://www.manydaughters.com/.

We would greatly appreciate your help distributing this open call through your channels. Do not hesitate to reach out if you have questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Attachment: #ManyDaughters - Call.pdf

Ask match searchers for patience (before 27. April 2025)

Recipients: single researchers who requested to be matched
Subject: #ManyDaughters: Potential matching researcher to team up with

Message:

Dear [RECIPIENT],

Thank you for registering for the #ManyDaughters project.

You indicated that you would be interested in teaming up with another researcher. [MATCHED RESEARCHER], also in cc to this email, indicated the same. Feel free to get in touch and coordinate bilaterally whether you would like to team up to participate jointly as a research team.

If you would like to form a research team, please email us at info@manydaughters.com before the registration deadline on Sunday, 27. April, 2025.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Manually check info provided in the entry survey

Recipients: researchers with eligibility and/or matching problems based on their entry survey responses
Subject: #ManyDaughters: Thanks for your registration - We still have a question
Message:
Dear [RECIPIENT],

Thank you for registering for the #ManyDaughters project.

I would like to double-check and streamline the information of your research team, as the information you provided in the registration survey did not fully match. Shall we consider your registration with the following names and email addresses:

Name_A – Email_A
Name_B (or Name_C) – Email_B

Best wishes also on behalf of the other project coordinators,
David Albrecht

Ask the second RT member to complete the entry survey

Recipients: RTs where only one member has completed the entry survey
Subject: #ManyDaughters: Thanks for your registration - We still miss the info on one team member

Message:

Dear [RECIPIENT],

Thank you for registering for the #ManyDaughters project.

I noticed that so far, only [RT MEMBER 1] has completed the registration survey. [RT MEMBER 2] please do not forget to complete the entry survey. You still have time to do so until the registration period ends on 27. April 2025.

Thank you, and best wishes also on behalf of the other project coordinators,
David Albrecht

Notification of registration (Monday, 28. April 2025)

Recipients: Respondents of the entry survey
Subject: #ManyDaughters: Confirmation of registration + Next steps

Message:

Dear [Name_1][Duo_RT][Name_2],

Thank you again for registering for the #ManyDaughters project.

The registration deadline has passed, and a total of 200 research teams indicated their interest in participating. We will now evaluate the eligibility of all registered research teams. You will receive a notification on whether you may participate in one week on Monday, May 5, 2025.

Kind regards also on behalf of the other project coordinators,
David Albrecht

Pointer to spam-folder (Monday, 28. April 2025)

Recipients: Respondents of the entry survey
Subject: #ManyDaughters: Do you correctly receive messages from info@manydaughters.com?

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

You just received a registration confirmation for the #ManyDaughters project sent from the project's email address info@manydaughters.com.

Please check your spam folder if you do not see the email. All future communication on the project will be sent through info@manydaughters.com. Please mark it as a safe sender to ensure you do not miss any information. If you have any further questions, do not hesitate to contact me.

Kind regards also on behalf of the other project coordinators,
David Albrecht

Getting info@manydaughters.com marked as safe sender (Monday, 28. April 2025)

Recipients: Respondents of the entry survey who indicated that they did not receive the registration confirmation
Subject: #ManyDaughters: Please send an email directly to info@manydaughters.com?

Message:

Dear XYZ,

Thank you for checking and informing us about the difficulty. I have just sent the confirmation of registration to you again.

If you received the email now, could you please quickly confirm? If you still have not received this email, could you please drop a message directly to info@manydaughtes.com? Then I will resend the registration confirmation as a response to your email. This way, info@manydaughters.com will likely be recognized as a legitimate sender by your email account.

Best wishes also on behalf of the other project coordinators,
David Albrecht

Follow up: email problems (Monday, 28. April 2025)

Recipients: Respondents who continue to not correctly receive emails from info@manydaughters.com
Subject: custom

Message:

Dear {{Recipient}},

Thanks for directly writing to info@manydaughters.com. We also added an additional authentication method to the email-address. Let's hope this resolves the issues.

I just resent the registration confirmation to you again a minute ago (both as a response to your email and as a new standalone message). Could you please check whether you received it?

If this does not work, I learned from some other research teams in the project that they needed to contact their institution's IT-HelpDesk to get info@manydaughters.com marked as a safe sender, such that it can pass the institution's email filter. This filter checks (and potentially blocks/quarantines) emails before they even reach your inbox or spam folder.

Best wishes also on behalf of the other project coordinators,
David Albrecht

Notification of non-participation - too many researchers (Monday, 05 May 2025)

Recipients: RT members who are NOT admitted to the study due to too many registrations
Subject: #ManyDaughters: Thank You for Your Interest in the Project

Message:

Dear {{name_1}}{{duo_rt}}{{name_2}},

Thank you very much for your interest in joining the #ManyDaughters project and for taking the time to register. Unfortunately, you may not participate in the #ManyDaughters project.

Due to large interest, we reached the maximum number of 160 research teams, specified in the eligibility criteria on our project website and in the pre-analysis plan published on the Open Science Framework on March 29, 2025. As such, we were unable to include all registered teams, and your team was not among the first 160 admitted to participate this time.

That said, we are already preparing similar many-analyst and crowdscience projects, and you are more than welcome to register again. If you like we can inform you first, once the next call for participation is out.

Thank you again for your support and understanding — we hope to collaborate with you soon.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Notification of non-participation - eligibility criteria (Monday, 05 May 2025)

Recipients: RT members who are NOT admitted to the study due to eligibility reasons
Subject: #ManyDaughters: We are sorry, you may not participate in this crowd science project

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are sorry, you may not participate in the #ManyDaughters project.

In our pre-analysis plan, which was uploaded to the Open Science Framework on Friday, 29. March 2025, we specified cutoffs for the eligibility criteria for participating in the #ManyDaughters project. Unfortunately, you did not meet all eligibility criteria. As a consequence, you are not admitted to participate.

Thank you again for your interest in the study and your registration. We prepare to run a similar many-analyst project and other crowdscience projects in the future, and you are more than welcome to register again. If you like we can inform you first, once the next call for participation is out.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Notification of non-participation - no PhD (Monday, 05 May 2025)

Recipients: RT members who are NOT admitted to the study due to eligibility reasons
Subject: #ManyDaughters: We are sorry, you may not participate in this crowd science project

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are sorry, you may not participate in the #ManyDaughters project.

In the eligibility criteria for participating in the #ManyDaughters project published on the project website, we specified that at least one member per research team needs to hold ahold a PhD in a social science discipline. Unfortunately, we could not verify that you already hold a PhD. As a consequence, you are not admitted to participate.

Thank you again for your interest in the study and your registration. We prepare to run a similar many-analyst project and other crowdscience projects in the future, and you are more than welcome to register again. If you like we can inform you first, once the next call for participation is out.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Notification of non-participation - missing info (Monday, 05 May 2025)

Recipients: RT members who are NOT admitted to the study due to missing info
Subject: #ManyDaughters: We are sorry, you may not participate in this crowd science project

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are sorry, you may not participate in the #ManyDaughters project.

Unfortunately, we did not receive all needed information from all researchers in your research team. As a consequence, you are not admitted to participate.

Thank you again for your interest in the study and your registration. We prepare to run a similar many-analyst project and other crowdscience projects in the future, and you are more than welcome to register again. If you like we can inform you first, once the next call for participation is out.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Notification of participation - data group (Monday, 05 May 2025)

Recipients: RT members who are admitted to the study.
Subject: #ManyDaughters: Welcome, you are invited to participate + Next steps

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

You are admitted to participate in the #ManyDaughters crowdscience project.

Your team was assigned the research team ID: {{rt_id}}. You will need this ID to identify yourself for future contributions to the project, like answering our surveys.

Additionally, we created a personal account for your research team on the https://www.manydaughters.com/ project website. You may now log in to your individual research team page using the email address/addresses you provided during registration: {{email_1}}{{duo_email}}{{email_2}}. Click the Login button and fill in your email address. You will be sent a single-sign-on link to access your research team page at your email address shortly after.

As a next step, you need to answer survey #1 (ca. 10 minutes) and sign your data use agreement so that you can get access to the data from the SOEP for the purpose of this project. The deadline to **complete the survey** and **sign the agreement** is **Sunday, 18 May 2025.**
You may find the link to the survey on your research team page at https://www.manydaughters.com/. If you are a team of two, please answer the survey jointly as a research team. Please also sign the data use agreement attached to this email and send it back to info@manydaughters.com. If you are a team of two, we need a separate data use agreement per member of your research team.

After survey #1 and the data use agreement, the phase for RTs to write PAPs and analysis code follows from **Monday, 26 May 2025,** to **Sunday, 20 July 2025**. You were randomly assigned to the data group. Consequently, you will receive access to SOEP data on **Monday, 26 May 2025**. Afterward, you have time until **Sunday, 20 July 2025,** to complete your pre-analysis plan and analysis code. You will receive an email with further information on the PAP and code writing phase by **Monday, 26 May 2025.**

Finally, one note of clarification: Please **consider the four research hypotheses H1 to H4** that you are testing **as causal hypotheses** when answering the surveys and developing your analysis.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Notification of participation - no-data group (Monday, 05 May 2025)

Recipients: RT members who are admitted to the study.
Subject: #ManyDaughters: Welcome, you are invited to participate + Next steps

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Confirmation of Receipt of Data Use Agreement

Recipients: All participating RT members
Subject: custom (usually RE:... as email is sent as response to RT member sending their Data Use Agreement)

Message:

Dear {{name}},

Thank you. I confirm the receipt of the signed Data Use Agreement.

Best wishes, also on behalf of the other project coordinators,
David Albrecht

Second Signature on Data Use Agreement Needed

Recipients: RT members who sent incomplete data use agreements
Subject: custom (usually RE:... as email is sent as response to RT member sending their Data Use Agreement)

Message:

Dear {{name}},

Thank you. Could you please also sign the “Restraint to Use Other Data Sources” on the document’s final page?

I heard from some RTs that they had difficulty signing the last page. Using Adobe Acrobat Reader and annotating/signing the last page seems to work for most. This is sufficient; there is no need to include a digital signature like you did on the first page.

Best wishes, also on behalf of the other project coordinators,
David Albrecht

Names + Emails Noted for Future Crowdscience Projects

Recipients: Non-participating RTs who indicated their interest to be informed about future projects
Subject: custom (usually RE:... as email is sent as response to RT member indicating their interest)

Message:

Dear {{name}},

Thank you again for your interest and time. I included your contact details on our list of researchers to be informed as soon as new calls for participation in crowdscience studies are out.

Best wishes, also on behalf of the other project coordinators,
David Albrecht

Reminder SOEP contract + 1. belief survey

Recipients: Participating RTs where at least one DataUseAgreement or the 1. Belief survey are still missing by Thursday, 15.05.2025
Subject: #ManyDaughters: Reminder survey #1 and data use agreement are due by 18. May 2025

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Please do not forget to respond to survey #1 and sign the data use agreement by 18. May 2025 for the #ManyDaughters project by 18. May 2025.

You may find the link to the survey on your research team page at https://www.manydaughters.com/. If you are a team of two, please **answer the survey jointly** as a research team. Please also sign the data use agreement on pages one and four (attached again also to this email) and send it back to info@manydaughters.com. If you are a team of two, we need a **separate data use agreement per member** of your research team.

If you are receiving this email, we still miss at least one of your RT member's data use agreement and/or your survey response.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Accidentally received Reminder

Recipients: Participating RTs who received the reminder from the previous page accidentally
Subject: custom

Dear {{name}},

Thanks for your reply and for double-checking. I received both your signed data use agreements and your survey response. No action required from you for the moment.

You must have accidentally gotten on the reminder mailing list. I apologize for the inconvenience.

Best wishes, also on behalf of the other project coordinators,
David Albrecht

Final Reminder: SOEP contract and/or 1. belief survey

Recipients: Participating RTs where at least one DataUseAgreement or the 1. belief survey are still missing by Monday, 19.05.2025
Subject: #ManyDaughters: Final reminder - data use agreement and survey #1 were due yesterday, 18. May 2025

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Unfortunately, we have not received all your inputs by the deadline of 18. May 2025. Please send them to us as soon as possible, latest by tomorrow, Tuesday 20. May 2025. If we do not receive your complete input by then, we will consider this a withdrawal and continue the project without you.

So far, {{Missing}} {{Non-missing}}

You may find the link to the survey on your research team page at https://www.manydaughters.com/. If you are a team of two, please **answer the survey jointly** as a research team. Please also sign the data use agreement on pages one and four (attached again also to this email) and send it back to info@manydaughters.com. If you are a team of two, we need a **separate data use agreement per member** of your research team.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

ADDENDUM (sent via david.albrecht@wzb.eu to complete N/A RTs)
Subject: #ManyDaughters: We have not heard from you in a while

Dear {{name}},

We have not heard from you with respect to the #ManyDaughters project in a while, so I wanted to double-check that you did not miss any of the emails from info@manydaughters.com, forwarded below.

Best,
David

PAP and codewriting phase

Announcement of RT-PAP + code writing phase (data group) (Friday, 23.05.2025)

Recipients: All participating RT members in the data group
Subject: #ManyDaughters: The PAP and analysis code writing phase begins

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you again for completing survey #1 and submitting your data use agreement(s).

Starting next week, you (RT {{rt_id}}) will enter the phase of writing your pre-analysis plan (PAP) and analysis code. You were randomly assigned to the **data group**. Consequently, you will receive access to the SOEP data by the SOEP data distribution team on **Monday, 26 May 2025**. You will then have time until **Sunday, 20 July 2025**, to complete and submit your PAP and analysis code.

To support you during this phase, we have compiled **detailed information on our project website**: https://www.manydaughters.com/info-for-RTs and in the FAQs. There, you will find an overview of the project tasks and timeline, as well as guidelines for writing your PAP and analysis code in Stata. You will also find a description of the dataset and a collection of helpful resources, which may be particularly useful if you are new to working with SOEP data. Please review all materials carefully and ensure you follow the guidelines. To help you get started, you will receive an analysis package including four example do-files — one for each hypothesis — along with the SOEP data, which you can use as a starting point for writing your code.

You may **submit your PAP and analysis code in your personal RT area on the project website** https://www.manydaughters.com/. In teams of two, either team member may do the submission. We regularly check your submissions. In particular, we check (i) whether your code runs without errors on the 5% of the data which you had access to (ii) whether it produces the submitted results when run on the 5% sample (i.e., achieves computational reproducibility), and (iii) whether it runs without errors on the remaining 95% of the data. If your code **produces errors** or yields **results different from the submitted ones**, we will ask you to address these issues and **submit revised code**.

After you submit your analysis code, please regularly check your personal RT area on the website for feedback. We aim to provide feedback by the next working day following your submission. Please note that any revised code and results must also be submitted by **Sunday, 20 July 2025**. If your team fails to submit code that runs without errors and reproduces the submitted results by this deadline, your team will be excluded from the project. Therefore, please allow some time before the deadline to account for feedback loops.

After the PAP and code writing phase, you will be asked to complete survey #2, which will be open from **Monday, 21 July 2025**, to **Sunday, 17 August 2025**. This will be followed by the peer assessment phase, during which you will evaluate the PAPs of 10 other research teams by **Sunday, 5 October 2025**. You will receive more information about survey #2 by **Monday, 21 July 2025**.

Finally, one note of clarification: Please **consider the four research hypotheses H1 to H4,** which you are testing **as causal hypotheses** when answering the surveys and developing your analysis.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions. However, we may not answer specific questions regarding the SOEP data or your analysis to avoid biasing any research teams. For such questions, we recommend reaching out to SOEP or your colleagues not involved in the #ManyDaughters project.

Kind regards,

The project coordinators

David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Announcement of RT-PAP + code writing phase (no-data group) (Friday, 23.05.2025)

Recipients: All participating RT members in the control group (no-data group)
Subject: #ManyDaughters: The PAP and analysis code writing phase begins

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you again for completing survey #1 and submitting your data use agreement(s).

Starting next week**,** you (RT {{rt_id}}) will enter the phase of writing your pre-analysis plan (PAP) and analysis code. You were randomly assigned to the **no-data group**. Consequently, you will receive access to SOEP data to develop your analysis code only after you have submitted your PAP. You may submit your PAP from **Monday, 26 May 2025,** until the latest **Thursday, 03 July 2025**, and you will receive access to the data by the SOEP data distribution team shortly after you submit your PAP. Once you can access the data, you must complete and submit your analysis code by **Sunday, 20 July 2025**.

To support you during this phase, we have compiled **detailed information on our project website**: https://www.manydaughters.com/info-for-RTs and in the FAQs. There, you will find an overview of the project tasks and timeline, as well as guidelines for writing your PAP and analysis code in Stata. You will also find a description of the dataset and a collection of helpful resources, which may be particularly useful as you develop your planned analysis and write the PAP without access to the data. Please review all materials carefully and ensure you follow the guidelines. To help you get started with writing the code, you will also receive four example do-files — one for each hypothesis — along with the SOEP data.

You may **submit your PAP and analysis code in your personal RT area on the project website** https://www.manydaughters.com/. In teams of two, either team member may do the submission. We regularly check your submissions and initiate the release of SOEP data to you as soon as you submit your PAP. Moreover, for your code submissions we check (i) whether your code runs without errors on the 5% of the data which you had access to (ii) whether it produces the submitted results when run on the 5% sample (i.e., achieves computational reproducibility), and (iii) whether it runs without errors on the remaining 95% of the data. If your code **produces errors** or yields **results different from the submitted ones**, we will ask you to address these issues and **submit revised code.**

After you submit your analysis code, please regularly check your personal RT area on the website for feedback. We aim to provide feedback by the next working day following your submission. Please note that any revised code and results must also be submitted by **Sunday, 20 July 2025**. If your team fails to submit code that runs without errors and reproduces the submitted results by this deadline, your team will be excluded from the project. Therefore, please allow some time before the deadline to account for feedback loops.

After the PAP and code writing phase, you will be asked to complete survey #2, which will be open from **Monday, 21 July 2025**, to **Sunday, 17 August 2025**. This will be followed by the peer assessment phase, during which you will evaluate the PAPs of 10 other research teams by **Sunday, 5 October 2025**. You will receive more information about survey #2 by **Monday, 21 July 2025**.

Finally, one note of clarification: Please **consider the four research hypotheses H1 to H4,** which you are testing **as causal hypotheses** when answering the surveys and developing your analysis.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions. However, we may not answer specific questions regarding the SOEP data or your analysis to avoid biasing any research teams. For such questions, we recommend reaching out to SOEP or your colleagues not involved in the #ManyDaughters project.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Pointer to spam-folder (Friday, 23. May 2025)

Recipients: Respondents of the entry survey
Subject: #ManyDaughters: You just received information on the upcoming project phase

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

You were just sent information on the next phase of the #ManyDaughters project from the project's email address info@manydaughters.com.

This is just a pointer from my personal institutional email, as the messages from info@manydaughters.com still go astray for some. Please also check your spam folder if you do not see the email in your inbox.

Kind regards also on behalf of the other project coordinators,
David Albrecht

No-data group: Confirmation of receipt RT-PAP / Announcement of code writing phase (control group; PAP submitted) (Thursdays, 5, 13, 19, 26 June or 3 July 2025)

Recipients: Participating RT members in no-data group who submitted PAP since the last confirmation mail
Subject: #ManyDaughters: PAP successfully submitted + writing analysis code

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for submitting your PAP for the #ManyDaughters project. You will receive access to the SOEP data by the SOEP data distribution team beginning of next week. Then you can begin implementing the analysis outlined in your PAP. You must complete and submit your analysis code by **Sunday, 20 July 2025.**

You may **submit your analysis code and results in your personal RT area on the project website** https://www.manydaughters.com/. One submission per RT is sufficient. We regularly check your submissions. In particular, we check (i) whether your code runs without errors on the 5% of the data which you had access to (ii) whether it produces the submitted results when run on the 5% sample (i.e., achieves computational reproducibility), and (iii) whether it runs without errors on the remaining 95% of the data. If your **code produces errors** or **yields results different from the submitted ones**, we will ask you to address these issues and **submit revised code and results**.

After you submit your analysis code, please regularly check your personal RT area on the website for feedback. We aim to provide feedback by the next working day following your submission. Please note that any revised code and results must also be submitted by **Sunday, 20 July 2025**. If your team fails to submit code that runs without errors and reproduces the submitted results by this deadline, your team will be excluded from the project. Therefore, please allow some time before the deadline to account for feedback loops.

Finally, when writing the analysis code, ensure that it is as close as possible to the analysis specified in your submitted PAP. If you make any additional decisions or changes, highlight these as comments in the code.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions. However, we may not answer specific questions regarding the SOEP data or your analysis to avoid biasing any research teams. For such questions, we recommend reaching out to SOEP or your colleagues not involved in the #ManyDaughters project.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Data group: Comments on code (upon receipt)

Recipients: Participating RT members in the data control group that submitted the RT_PAP + code
Subject: #ManyDaughters: Your submission of the PAP and analysis code

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for submitting your PAP and the analysis code for the #ManyDaughters project.

I just checked your analysis code for computational reproducibility, and you should be able to see the results of the check in your RT-page of the project website.

Example text: *“H1 and H4 look good now. For H2, I receive an error message when running your code on the 95%-sample. It seems that this is caused by some variable taking on unexpected values in this larger sample. For H3, I have difficulty reproducing the results you submitted. I obtain completely different values, even a coefficient of opposite sign. Just as for H2, also for H3 I also receive an error message when running your code on the 95%-sample. It seems again that this is caused by some variable taking on unexpected values in this larger sample.”*

You may see the results and log-files I obtain from running your code in your RT-page on the project website. The log-files of the code that produces errors indicate in the beginning in which lines the errors occur. Example text: *“For your convenience, I also include excerpts from the log-files and the error messages below. Could you please take a look where the variation in results for H3 may stem from and whether you can adapt your code to avoid the errors?”*

Please let me know if you need any further information or if you have any further questions. The log-files from running your code on the 95%-sample are largely censored to not reveal any results, as you are not supposed to see these at the current stage of the project. However, if there is specific information from the 95%-sample you need for debugging I will try my best to provide it to you.

Best wishes, also on behalf of the other project coordinators,
David

No-data group: Comments on code (upon receipt)

Recipients: Participating RT members in the no-data control group who submitted their analysis code
Subject: #ManyDaughters: Your submission of the analysis code

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for submitting your analysis code for the #ManyDaughters project.

I just checked your analysis code for computational reproducibility, and you should be able to see the results of the check in your RT page of the project website.

Your code for H2 and H3 looks good. For H1 and H4 I have difficulty reproducing your results. Please check the Stata log-files. At first glimpse, it looks as if the command ivreg2 needs installation (of an extra package), which is not yet included in your do-files.

You may see the results and log-files I obtain from running your code in your RT-page on the project website. Please let me know if you need any further information or if you have any further questions. The log-files from running your code on the 95%-sample are largely censored to not reveal any results, as you are not supposed to see these at the current stage of the project.

Best wishes, also on behalf of the other project coordinators,
David

No-data group: Multiple Specifications (upon receipt)

Recipients: Participating RT members in the no-data/control group who violate the “one regression per hypothesis criterion”
Subject: #ManyDaughters: Your submission of the analysis code

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for submitting your analysis code for the #ManyDaughters project.

I just checked your analysis code for computational reproducibility, and you should be able to see the results in your RT-page of the project website.

In general, all your code is computationally reproducible. However, I noticed that your analysis is based on multiple regressions/tests/outcome variables per hypothesis. Your analysis should result in **one single regression-based test per hypothesis, with one relevant coefficient estimate, one standard error, one p-value, etc.**

To adhere to the analysis restriction that there should be only one regression-based test per hypothesis, please adapt your code and PAP as follows.

In your PAP, please choose the one specification per hypothesis that you deem most appropriate to test the hypothesis. This decision should be influenced by the thoughts you had while writing your PAP and not by any inferences you might have drawn after having received access to the data. Please remove the parts of your PAP that refer to the additional regression-based test that you do not want to keep, so that there is only one test per hypothesis. Please, do not change anything for the regression you keep and the way you describe it in your PAP.

In your code, it would be great if you could comment out, rather than delete, superseded passages in your do-files and explain your changes in a comment.

I reopened the PAP submission field in your RT page on the project website. Once you submit the new PAP I will reopen the code/results upload fields, and you can also upload your updated do-files and results to the webpage.

Best wishes, also on behalf of the other project coordinators,
David

Mid-term Check-in (data group) (Thursday, 26 June 2025)

Recipients: Participating RT members in the data group who have not submitted a PAP and reproducible code
Subject: #ManyDaughters: PAP and code-writing phase about halfway over

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are about halfway into the PAP and code-writing phase. You must complete and submit your PAP and analysis code by **Sunday, 20 July 2025.**

You may **submit your PAP code and analysis results in your personal RT area on the project website** https://www.manydaughters.com/. One submission per RT is sufficient.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions. However, we may not answer specific questions regarding the SOEP data or your analysis to avoid biasing any research teams. For such questions, we recommend reaching out to SOEP or your colleagues not involved in the #ManyDaughters project. We would also like to remind you that, from our side, there is **no restriction on using LLM-based tools**, such as ChatGPT, **to scan, filter, and process the SOEP resources**, and to, for example, use the browser's built-in translation to overcome language difficulties.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Reminder PAP Deadline (no-data group) (Thursday, 26 June 2025)

Recipients: Participating RT members in the control group who have not submitted a PAP
Subject: #ManyDaughters: Deadline to submit your PAP is approaching

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Please do not forget to complete and submit your PAP for the #ManyDaughters project by **Thursday, 03 July 2025**. Afterward, you will receive access to the SOEP data from the SOEP data distribution team. Then you can begin implementing the analysis outlined in your PAP. You must complete and submit your analysis code by **Sunday, 20 July 2025.**

You may **submit your PAP in your personal RT area on the project website** https://www.manydaughters.com/. One submission per RT is sufficient.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions. However, we may not answer specific questions regarding the SOEP data or your analysis to avoid biasing any research teams. For such questions, we recommend reaching out to SOEP or your colleagues not involved in the #ManyDaughters project. We would also like to remind you that, from our side, there is **no restriction on using LLM-based tools**, such as ChatGPT, **to scan, filter, and process the SOEP resources**, and to, for example, use the browser's built-in translation to overcome language difficulties.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Extension of PAP and code-writing phase (data group) (Monday, 07 July 2025)

Recipients: Participating RT members in the data group
Subject: #ManyDaughters: Extension of code-writing phase

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are excited to see that 150 out of 160 initially admitted RTs are still active in the #ManyDaughters project, and we are receiving numerous submissions of PAPs and analysis codes these days. To allow all of you more time to prepare your PAP and analysis code, we will extend the deadline for the PAP and code-writing phase. The **new deadline to complete and submit your analysis code** is **Friday, 01 August 2025.** The following phases of the project will be shifted in the future accordingly. Please allow some days for these changes to be reflected in all places on the project website.

You may **submit your PAP, code, and analysis results in your personal RT area on the project website** https://www.manydaughters.com/. One submission per RT is sufficient.

We regularly check your submissions, usually **within one working day**. In particular, we check (i) whether your code runs without errors on the 5% of the data to which you had access to (ii) whether it produces the submitted results when run on the 5% sample (i.e., achieves computational reproducibility), and (iii) whether it runs without errors on the remaining 95% of the data. If your **code produces errors** or **yields results that differ from the submitted ones, we will request that you address these issues and submit revised code and results**.

It's not a problem if your code is not immediately reproducible, as we will provide feedback and iterate until it is. Still, **since iterations can take up several days** (so far, many have taken about a week), the best approach is to **submit as early as possible and with the best code you can**. Any revised code and results must also be submitted by **Friday, 01 August 2025.** If your team fails to submit code that runs without errors and reproduces the submitted results by this deadline, your team will be excluded from the project.

Based on our experience with the submissions we have already received, we would like to re-emphasize one aspect. It is important that, **for each hypothesis, your analysis provides one regression-based test**. This test should yield unambiguous details (one coefficient estimate, one p-value, etc.) listed in the "Analysis Code" section of the Information for RTs on our webpage.

Please do not hesitate to contact us at info@manydaughters.com if you encounter any issues or have questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

P.S. Please note we are out of office on Thursday, 24. July and Friday, 25. July. We will respond to emails sent to info@manydaughters.com and provide feedback on the analysis code submitted on these days at the beginning of the following week. Thank you for your understanding.

Extension of PAP and code-writing phase (no-data group) (Monday, 07 July 2025)

Recipients: Participating RT members in the no-data group
Subject: #ManyDaughters: Extension of code-writing phase

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are excited to see that 150 out of 160 initially admitted RTs are still active in the #ManyDaughters project, and we are receiving numerous submissions of PAPs and analysis codes these days. To allow all of you more time to prepare your analysis code, we will extend the deadline for the PAP and code-writing phase. The new deadline to complete and submit your PAP and analysis code is **Friday, 01 August 2025.** The following phases of the project will be shifted to the future accordingly. Kind regards,

The project coordinators

David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

P.S. Please note we are out of office on Thursday, 24. July and Friday, 25. July. We will respond to emails sent to info@manydaughters.com and provide feedback on the analysis code submitted on these days at the beginning of the following week. Thank you for your understanding.

Reminder: Only PAP still missing (Wednesday, 23 July 2025)

Recipients: Participating RT members in data group that have submitted reproducible code but no PAP yet
Subject: #ManyDaughters: The deadline of the PAP and codewriting phase is approaching on **Friday, 01 August 2025**

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you again for submitting your analysis code. As already confirmed, we were able to run your code without errors and reproduce the submitted results. Please do not forget to also complete and **submit your PAP** for the #ManyDaughters project by **Friday, 01 August 2025**. You may do so in your personal RT area on the project website. One submission per RT is sufficient.

The next step will be to complete survey #2, which opens on **Monday, 11 August 2025.** We will provide you with further instructions by that time.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Best wishes,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Reminder: Only code still missing (Wednesday, 23 July 2025)

Recipients: Participating RT members in the data group who have submitted their PAP but have not submitted their code yet and RT members in the no-data group who have not submitted their code yet
Subject: #ManyDaughters: The deadline of the PAP and codewriting phase is approaching on **Friday, 01 August 2025**

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you again for already submitting your PAP. Please do not forget to also complete and **submit your analysis code** for the #ManyDaughters project by **Friday, 01 August 2025**.

You may **submit your code and analysis results in your personal RT area on the project website** https://www.manydaughters.com/. One submission per RT is sufficient.

We regularly check your submissions, usually **within one working day**. In particular, we check (i) whether your code runs without errors on the 5% of the data to which you had access to (ii) whether it produces the submitted results when run on the 5% sample (i.e., achieves computational reproducibility), and (iii) whether it runs without errors on the remaining 95% of the data. If your **code produces errors** or **yields results that differ from the submitted ones, we will request that you address these issues and submit revised code and results**.

Confirmation PAP and code successfully submitted (upon event)

Recipients: Participating RT members who have submitted their PAP and code that is fully reproducible
Subject: #ManyDaughters: Successful completion of the PAP and code-writing phase

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for submitting your PAP and analysis code. I just checked your analysis code for computational reproducibility, and you should be able to see the results of the check in your RT-page of the project website. Your analysis for all four hypotheses H1 to H4 is computationally reproducible and runs without errors.

You completed the PAP and code-writing phase. We will be in touch with you again after the PAP and code-writing phase has officially concluded.

Best wishes, also on behalf of the other project coordinators,
David

Notification of drop-out (no-data group 04.07.2025)

Recipients: Participating RT members in the no-data group who have not submitted their PAP by 03.07.2025
Subject: #ManyDaughters: We did not receive your PAP

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

On Friday, 01 August, the deadline of the PAP and code-writing phase for the #ManyDaughters has passed. We did not receive your submission. Please let us know if we have missed it.

Without a submission, we will consider you as having dropped out of the project. Nevertheless, we would like to thank you again for your interest in the #ManyDaughters project and your contribution up to this point.

Kind regards,

The project coordinators

David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Survey 2 + peer assessment

Announcement of 2. Belief survey (Monday, 21 July 2025)

Recipients: All participating RT members
Subject: #ManyDaughters: Please respond to survey #2

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

The PAP and code writing phase has ended. We would like to thank you again for your effort and the time you spent preparing your submissions.

As a next step, you need to answer **survey #2** (ca. 10 min). The survey will be online from **Monday, 11 August** until **Sunday, 07 September 2025**. You may find the link to the survey on your personal research team page at https://www.manydaughters.com/. If you are a team of two, please answer the survey jointly as a research team.

Survey #2 will be followed by the **peer assessment phase**, during which you will evaluate the PAPs of 10 other research teams by **Sunday, 19 October 2025**. We will provide you with further instructions by **Monday, 08 September 2025**.

Upon feedback received from RTs during the PAP + codewriting phase, we decided to give the opportunity for all RTs from both the no-data and data groups to add a **comment to their submitted PAP**. These comments will be posted at OSF alongside the submitted PAPs. They shall give room to comment and explain changes the RTs' analysis strategies have undergone upon receiving access to the 5% sample of the data. We will provide further information on this after completion of the peer assessment phase.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Reminder of 2. Belief survey (03. September 2025)

Recipients: All RT members, that did not yet answer survey #2
Subject: #ManyDaughters: Don’t forget to answer survey #2

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Please do not forget to respond to survey #2 (ca. 10min) for the #ManyDaughters project by **Sunday, 08. September.**

You may find the link to the survey on your research team page at https://www.manydaughters.com/. If you are a team of two, please **answer the survey jointly** as a research team.

The deadline for responding to survey #2 is binding. There is no room for extensions, as we will proceed to the **peer assessment phase,** during which you will evaluate the PAPs of 10 other research teams, immediately following this.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Announcement of peer assessment phase (Monday, 08 September 2025)

Recipients: All participating RT members
Subject: #ManyDaughters: Please review PAPs

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for answering survey #2 and for all your contributions to the #ManyDaughters project up to this point. We are excited that **127 research teams are still active** and have submitted their PAPs and analysis code for the project.

As a **final step** in the #ManyDaughters project, you will need to review 10 PAPs of other participating research teams in the **peer assessment survey until Sunday, 19 October 2025**. We are currently preparing the peer assessment phase by anonymizing the PAPs, randomly matching 10 PAPs for assessment to all RTs, and preparing file packages of PAPs to be reviewed for all research teams. This should not take long, and you can expect to **hear from us again in the coming days once the survey goes online**.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Announcement of peer assessment survey (Tuesday, 09 September 2025)

Recipients: All participating RT members
Subject: #ManyDaughters: Peer assessment survey online - Please review PAPs

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

All **materials for the peer assessment phase**, along with the **link to the survey**, are **now available** on your personal research team page at https://www.manydaughters.com/.

Please download the **file package** from your RT-page. This package contains **detailed instructions** for the peer assessment phase and the **pdf-files of 10 anonymized PAPs** from randomly selected research teams, which we ask you to evaluate.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Reminder of peer assessment survey (Monday, 13. October 2025)

Recipients: All participating RT members
Subject: #ManyDaughters: Please do not forget to answer the peer assessment survey

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Please do not forget to respond to survey #3 until **Sunday, 19 October 2025**.

You may find the link to the survey on your research team page at https://www.manydaughters.com/. If you are a team of two, please **coordinate your response within the research team**.

Do not hesitate to contact us at info@manydaughters.com if you encounter any problems or have any questions.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Reminder of Peer Assessment Survey (after deadline has passed, 20. October 2025)

Recipients: All RT members, that did not yet answer survey #3
Subject: #ManyDaughters: We did not receive your response to the peer assessment survey

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Yesterday, on Sunday, 19. October 2025, the deadline for submitting your response to the peer assessment survey for the #ManyDaughters project has passed. We did not receive your submission.

Please let us know if we have missed it. If you have not yet responded, could you please do so by Friday, 24. October. Without a submission, we will consider you as having dropped out of the project.

Kind regards,

The project coordinators

David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

General

Data collection completed (24. October 2025)

Recipients: All active RTs
Subject: #ManyDaughters: Data collection completed

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We would like to share some great news with you: the data collection for the project is completed, and **we received PAPs, analysis code, and survey responses from 127 RTs**. We would like to **thank you** again for your interest in the #ManyDaughters project and your contribution up to this point.

Right now, we are already in the middle of **analyzing the data** according to the PAP, which we preregistered for the entire project. You can expect to hear from us as soon as we have a **first draft** for the corresponding paper. Soon, we will also come back to those RTs who were randomly drawn to receive a **bonus** for the belief elicitation questions in the surveys.

As announced earlier, we want to give the opportunity for all RTs from both the no-data and data groups to add a **comment to their submitted PAP**. These comments will be posted at OSF alongside the submitted PAPs. They shall give room to comment and explain the changes the RTs' analysis strategies have undergone upon receiving access to the 5% sample of the data. Please feel invited to send your comments to info@manydaughters.com.

Finally, we would love to hear about any positive or negative **feedback and other comments** you have about the project. We would like to use these to improve ourselves when running future crowdscience projects. Moreover, we aim to summarize our experiences and your feedback into an **experience report** on running a many-analyst study to share with the whole community.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Response to Withdrawals

Recipients: Withdrawing RT members
Subject: RE: same as withdrawal notice by RT

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We are sorry to hear you need to withdraw due to time constraints. We would like to thank you again for your interest in the #ManyDaughters project and your contribution up to this point.

We are looking forward to welcoming you again for future crowdscience projects we are organizing.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Progress Update Dec 2025 (01. December 2025)

Recipients: All active RTs
Subject: #ManyDaughters Project Update

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We hope this email finds you well, and we would like to share a project update with you. Currently, we are still in the process of implementing the (meta-)analyses we specified in our PAP for the project. In parts, this turned out to be more computationally intensive and time-consuming than expected. As such, we will likely come back to you with a first draft and the project's results only in the spring of 2026.

We wish you all a good transition into 2026, and we will come back to you with further updates next year.

Kind regards,
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Progress Update Jun 2026 (16. June 2026)

Recipients: All active RTs
Subject: #ManyDaughters Project Update - June 2026

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

We hope this email finds you well. It has been a while since our last project update, and we have received many interested inquiries about the project from several RTs, both in person and via email. We want to thank all of you for your interest and continuing curiosity, and we wanted to share a project update.

Recently, we completed a first draft of the paper, which is currently circulated for review among the project coordinators to collect a first round of feedback. After incorporating their feedback, we will make the draft available to you, i.e., all RTs. You can expect to hear back from us during the summer.

Kind regards,
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Feedback and Comments

RT-PAP Comment received

Recipients: RTs who submitted a comment to their RT-PAP
Subject: RE: [...] (usually this will be a reply to an original email by the RT

Message:

Dear XYZ,

Thank you very much for submitting the comment. We will post it at OSF alongside your submitted PAP once all project and supplementary materials are made available alongside the published paper.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

RT Feedback received

Recipients: RTs who submitted some kind of feedback
Subject: RE: [...] (usually this will be a reply to an original email by the RT

Message:

Dear XYZ,

Thank you very much for sharing your thoughts. We will collect them along with other feedback we receive, to generate an experience report which will benefit future many-analyst projects.

We are looking forward to coming back to you soon with news on the progress of the first draft.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Collecting Feedback on 1. draft of paper

Recipients: All active RTs
Subject: #ManyDaughters - Draft of paper

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

Thank you for your patience as we brought together all parts of the project into a draft research paper. It took longer than expected because some of the computations were much more time-consuming and computationally intensive than we had anticipated.

We are pleased to share the first draft with you and to invite your feedback. You can access the draft via this OSF repository: [LINK NEEDED]. Please treat both the link and the draft as confidential and do not share or circulate them; the draft is not publicly available at this stage.

1. **Feedback.** We welcome your general feedback on the paper, as well as any specific suggestions you think could improve it.
   We kindly ask you to return feedback using the attached Excel template. Please complete the “RT Information” tab and then enter your comments in the “Feedback” tab, with one comment per row. Where possible, please indicate the relevant page and line numbers. For comments about figures, tables, equations, sections, or the paper as a whole, please use the corresponding locator fields. We also ask you to rate the severity of each comment on a scale of 1 (“minor”) to 3 (“major”), which will help us prioritize and process feedback across all teams.
   To make the feedback as useful as possible, please provide concrete suggestions and enough detail for us to evaluate them. For example, if you suggest a wording change, please include proposed wording; if you suggest adding a reference, please provide the full citation details and, if available, a DOI or URL; if you raise a conceptual, methodological, or interpretive concern, please briefly explain the rationale.
2. **Co-authorship.** As you have completed all parts of the project, we are more than happy to offer your RT co-authorship on the paper. Please indicate in the “RT Information” tab whether you would like to be listed as co-author(s). You can revisit the co-authorship terms on the project webpage.
3. **Contact details.** To ensure we have your up-to-date contact and affiliation details, we kindly ask you to also indicate these in the “RT Information” tab.

Please return the completed spreadsheet by **Sunday, 9. August 2026**. If you worked as a team of two, we kindly ask that you coordinate with your teammate and send a single combined response; this will help us process input from all 127 teams.

The project team will review the submitted feedback carefully, weigh any conflicting proposals, and decide how best to incorporate changes. We would like to process the

incoming feedback making use of LLMs, and kindly ask you to object if you do not want your feedback to be fed to an LLM. In either case, we cannot promise that every suggestion will be incorporated or that we will be able to respond to each comment individually, but we will do our best to give a fair account of co-authors' suggested edits. We will share a revised draft once we have incorporated the feedback.

Separately, we will pay out bonuses for the belief-elicitation tasks in the project surveys. As described in the surveys, we will randomly select 10 teams from Survey 1 and 10 teams from Survey 2, draw one of the four hypotheses at random, and pay each member of the selected teams a bonus of €100, depending on the accuracy of the team's stated belief about whether that hypothesis is supported by the study's final results. We will contact the relevant teams in a separate email.

Kind regards,
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

Collecting Feedback on 1. draft of paper - reminder

Recipients: All active RTs who have not responded until 03 August 2026
Subject: #ManyDaughters - Reminder: Please respond with respect to our first draft of the paper

Message:

Dear {{Name_1}}{{Duo_RT}}{{Name_2}},

This is a kind reminder that we distributed the first draft of the #ManyDaughters paper a few weeks ago. We need your confirmation on whether you would like to accept our offer to become a co-author, and we are happy to receive any feedback you might have regarding the draft. Please respond by **Sunday, 9 August 2026**. Please take a look at the forwarded original email for all details.

To make sure this info does not get stuck in any spam filters, you will also receive a copy of this email sent by david.albrecht@wzb.eu in a few minutes.

Kind regards,
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

— Start of forwarded message below

Thank you for your patience as we brought together all parts of the project into a draft research paper. It took longer than expected because some of the computations were much more time-consuming and computationally intensive than we had anticipated.

We are pleased to share the first draft with you and to invite your feedback. You can access the draft via this OSF repository: [LINK NEEDED]. Please treat both the link and the draft as confidential and do not share or circulate them; the draft is not publicly available at this stage.

4. **Feedback.** We welcome your general feedback on the paper, as well as any specific suggestions you think could improve it.
   We kindly ask you to return feedback using the attached Excel template. Please complete the “RT Information” tab and then enter your comments in the “Feedback” tab, with one comment per row. Where possible, please indicate the relevant page and line numbers. For comments about figures, tables, equations, sections, or the paper as a whole, please use the corresponding locator fields. We also ask you to rate the severity of each comment on a scale of 1 (“minor”) to 3 (“major”), which will help us prioritize and process feedback across all teams.
   To make the feedback as useful as possible, please provide concrete suggestions and enough detail for us to evaluate them. For example, if you suggest a wording change, please include proposed wording; if you suggest adding a reference, please provide the full citation details and, if available, a DOI or URL; if you raise a

conceptual, methodological, or interpretive concern, please briefly explain the rationale.

5. **Co-authorship.** As you have completed all parts of the project, we are more than happy to offer your RT co-authorship on the paper. Please indicate in the “RT Information” tab whether you would like to be listed as co-author(s). You can revisit the co-authorship terms on the project webpage.
6. **Contact details.** To ensure we have your up-to-date contact and affiliation details, we kindly ask you to also indicate these in the “RT Information” tab.

Please return the completed spreadsheet by **Sunday, 9. August 2026**. If you worked as a team of two, we kindly ask that you coordinate with your teammate and send a single combined response; this will help us process input from all 127 teams.

The project team will review the submitted feedback carefully, weigh any conflicting proposals, and decide how best to incorporate changes. We would like to process the incoming feedback making use of LLMs, and kindly ask you to object if you do not want your feedback to be fed to an LLM. In either case, we cannot promise that every suggestion will be incorporated or that we will be able to respond to each comment individually, but we will do our best to give a fair account of co-authors’ suggested edits. We will share a revised draft once we have incorporated the feedback.

Separately, we will pay out bonuses for the belief-elicitation tasks in the project surveys. As described in the surveys, we will randomly select 10 teams from Survey 1 and 10 teams from Survey 2, draw one of the four hypotheses at random, and pay each member of the selected teams a bonus of €100, depending on the accuracy of the team's stated belief about whether that hypothesis is supported by the study's final results. We will contact the relevant teams in a separate email.

RT Draft Feedback received + co-authorship wanted

Recipients: RTs who submitted their feedback
Subject: RE: [...] (usually this will be a reply to an original email by the RT

Message:

Dear XYZ,

Thank you very much for sharing your feedback and for your willingness to become a coauthor.

We will collect and review input from all RTs and share a revised draft once we have synthesized the feedback.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert

RT Draft No comments received + co-authorship wanted

Recipients: RTs who submitted a “no-comments” feedback
Subject: RE: [...] (usually this will be a reply to an original email by the RT

Message:

Dear XYZ,

Thank you very much for your response and for your willingness to become a coauthor.

We will collect and review input from all RTs and share a revised draft once we have synthesized the feedback.

Kind regards,

The project coordinators
David Albrecht, Aurélien Baillon, Anna Dreber, Felix Holzmeister, Taisuke Imai, Magnus Johannesson, Levent Neyse, Severine Toussaert
