::: SAMPLE RESTRICTION

We focus on parents with only one child, as the gender of the firstborn is effectively random, while the likelihood of having a second (or plus) child is influenced by the gender of the firstborn [ref: Dahl and Moretti (2008)].

::: OUTCOMES

H1. Having **daughters** leads to stronger support for **gender equality** (as measured by **attitudes**).

- H1_A: pgen5 (2019) / *GE_kids*

Schools and kindergartens should encourage children to take part in activities that are not typical for their gender [1=Totally No ...7=Totally Yes]

- H1_B: plj0625 (2016; 2017) / *GE_family*

The husband should have the final say in all family matters [1=Totally No ...7=Totally Yes]

- H1_C: pfam6 (2018) / *GE_work*

Best if man and woman work the same amount so they can share the responsibility [1=Totally No ...7=Totally Yes]

H2. Having **daughters** leads to more **left-leaning** political **preferences**.

- ppol6 (2005; 2014; 2019) / *Left*

Political attitude: Left vs Right [0=Extreme Left … 10=Extreme Right]

➔ Recoding: *Left*=1 (if 0-4) else =0

H3. Having **daughters** leads to more **gender equality** in the **household** (measured by **behaviors/outcomes).**

- pwerk3 (2000—2020) / *GE_housechores*

What is a typical weekday like for you? How many hours per normal workday do you spend on the following activities? - Housework (washing / cooking / cleaning) [0...24: hours]

H4. Having **daughters** leads to a larger increase in the support of **gender equality** for **men** than for **women** (measured by **attitudes**).

- H4_A: pgen5 (2019) / *GE_kids*

Schools and kindergartens should encourage children to take part in activities that are not typical for their gender [1=Totally No ...7=Totally Yes]

- H4_B: plj0625 (2016; 2017) / *GE_family*

The husband should have the final say in all family matters [1=Totally No ...7=Totally Yes]

- H4_C: pfam6 (2018) / GE_*work*

Best if man and woman work the same amount so they can share the responsibility [1=Totally No ...7=Totally Yes]

::: CONTROLS

1627_p_fhf / kidsex01 - sex of first child [1=Male; 2=Female]
→ Recoding: *Daughter*=1 (if 2) else=0

sex – gender repondent [1=Male; 2=Female]
→ Recoding: *Male*=1 (if 1) else=0
---
age

married - biol/lb0640 [1=Yese; 2=No]
→ *Married*=1 (if 1) else=0

employment status - pl/plb0022_h [i.dummizided for >0]

income - pl/plc0013_h [if >0]

completed edu - pl/plg0076 [1=Yes; 2=No]

::: AUXILIARY VARIABLES

PID, HHID, HID

::: SPECIFICATIONS

H1_A:
